Summary

Backend / Full-Stack Developer with hands-on experience in Node.js, React, Open Source, and CLI **tooling. Active open-source contributor with recent merged contributions to Tambo AI, improving self-hosting workflows and developer documentation. Passionate about building automation tools, AI-powered platforms, and scalable web applications, with strong fundamentals in Git, APIs, and system design.**

Experience

Open Source Contributions   *Active Contributor*

TAMBO-AI

- **Contributed to Tambo AI core repository, focusing on self-hosting improvements and developer tooling. [#1883]**
- **Added npm scripts to simplify local setup and deployment for operators.**
- **Improved OPERATORS.md documentation, making self-hosting instructions clearer and more production-ready.**
- **Collaborated with maintainers through PR reviews, CI checks, and security bot feedback.**
- **PR successfully merged into main branch after review and conflict resolution.**
- **Tech: Node.js, npm, GitHub Actions, Bash, Docker, Open-Source Collaboration**

Projects

Auto-pr-cli – Developer Productivity Tracker   *repo* ↗

- Developed a CLI tool to **automate pull request creation**, validation, and formatting.
- Reduced manual PR effort by automating branch checks, commit summaries, and metadata generation.
- Designed for developer productivity and open-source workflows.
- **Tech Stack:** Node.js, Git, CLI tooling

Nutri Bud —Ai- powered Nutrition & Health Assistant   *repo* ↗

- Built a nutrition-focused application to help users track meals and receive personalized diet insights.
- Focused on clean UI integration and scalable backend design.
- Implemented backend APIs for user data handling and nutrition logic.
- **Tech Stack:** Next.js 15, Tailwind CSS, TypeScript, Supa base (auth & database), Groq LLaMA3 for diet, jsPDF for download

Education

Abes Institute of Technology   *Sept 2023 – Nov 2027*

B.Tech in Computer Science and Engineering

Technologies

Languages: JavaScript, Node.js, C, Java
Backend Development: REST APIs, express, WebSockets, JWT, OAuth
Tools & Technologies: Docker, Git, CI/CD, Postman, CURL
Environment: Linux (wsl), Neovim, Bash,

Achievements

- Successfully merged **open-source contributions** into Tambo AI main branch [#1883]
