SUMMARY

Computer Science undergraduate (B.Tech, 2027) with a strong foundation in data structures, algorithms, and problem solving, and hands-on experience building scalable backend systems with Node.js, Java, and REST APIs. Winner of Hacknovate 7.0. Active open-source contributor with merged pull requests to Tambo AI and Cal.diy. Experienced in AI-powered applications, CLI tooling, and system design fundamentals.

EXPERIENCE - OPEN SOURCE CONTRIBUTIONS

Tambo AI *Merged PR #1883*

- Improved self-hosting workflows by adding npm scripts that simplify local setup and deployment for operators.
- Rewrote sections of OPERATORS.md to make self-hosting instructions clearer and production-ready.

Cal.diy (Cal.com) *Merged PR #30135*

- Fixed issue #30135 with a focused, minimal-impact change inside the existing codebase.
- Incorporated maintainer feedback through the GitHub code review process.

EDUCATION

Abes Institute of Technology, Ghaziabad *Sep 2023 – Aug 2027*

B.Tech in Computer Science and Engineering | CGPA: 8.0

New Rainbow Public School, Ghaziabad *Class XII*

Senior Secondary (Class XII) | 83.33%

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design fundamentals

Languages: Java , JavaScript, TypeScript, C

Backend & Databases: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth, SQL, PostgreSQL (Supabase)

Frontend & AI: React, Next.js, Tailwind CSS, LangChain, RAG, LLM APIs (Groq)

Tools: Git, GitHub, Docker, CI/CD, Postman, cURL, Linux (WSL), vim

PROJECTS

VITAL – Agentic AI Healthcare Assistant - Link *Tech: React, Supabase, Twilio, Deepgram, Algorand, LangChain*

- Built an autonomous voice check-in agent using Twilio and Deepgram to reduce staff workload through human-like patient calls.
- Designed a RAG pipeline with LangChain to reduce hallucinations and keep responses patient-specific.
- Implemented intelligent follow-up questioning that correlates reported symptoms to flag possible conditions early.

Auto-pr-cli – Developer Productivity Tool - Link *Tech: Node.js, Git, CLI*

- Developed a CLI tool that automates pull request creation, validation, and formatting.
- Reduced manual PR effort by automating branch checks, commit summaries, and metadata generation.

Nutri Bud – AI Nutrition Assistant - Link *Tech: Next.js, TypeScript, Supabase, Groq LLaMA 3*

- Built a full-stack app for meal tracking and personalized diet insights, with Supabase authentication and database.
- Designed a clean UI and scalable backend, with LLM-generated diet plans exportable as PDF.

ACHIEVEMENTS

- **Winner, Hacknovate 7.0,** — Won the hackathon for building VITAL, an AI-powered healthcare assistant.
- **Smart India Hackathon 2025 — Internal Shortlist** — Selected among shortlisted teams at ABESIT for a MathWorks problem statement on AI-based traffic simulation.
- **Open Source Contributor** — Merged contributions to Tambo AI and Cal.diy, including developer tooling and codebase improvements.

CERTIFICATE

- BCS-301 Data Structure at code chef
- Fundamental of Linux & AWS training badge
