Summary

Backend / Full-Stack Developer with hands-on experience in Node.js, React, Open Source, and CLI **tooling. Winner of Hacknovate 7.0 Active open- source contributor with recent merged contributions to Tambo AI, improving self-hosting workflows and developer documentation. Passionate about building automation tools, AI-powered platforms, and scalable web applications, with strong fundamentals in Git, APIs, and system design.**

Experience

Open Source Contributions *Active Contributor*

TAMBO-AI

- **Contributed to Tambo AI core repository, focusing on self-hosting improvements and developer tooling. [#1883]**
- **Added npm scripts to simplify local setup and deployment for operators.**
- **Improved OPERATORS.md documentation, making self-hosting instructions clearer and more production-ready.**

CALCOM/CAL.DIY

- **Contributed to Cal.diy by addressing #30135 with a focused, minimal-impact code change.**
- **Implemented the fix within the existing codebase and incorporated maintainer feedback through the GitHub review process.**
- **Pull Request: #30135**

Projects

VITAL - Agentic AI Healthcare *repo*

- **Autonomous Voice Check-ins: Human-like Calling Agent reducing Staff overload**
- **Intelligent Questioning and Symptom Correlation: Agent ask important symptom questions related to patient like metallic taste can mean Type 2 Diabetes has become Type 3**
- **RAG-Enhanced system to PREVENT HALLUCINATIONS and be patient-specefic**
- **TECH STACk: React , supabase, twilio, Deepgram, Algorand, langchain**

Auto-pr-cli – Developer Productivity Tracker *repo*

- Developed a CLI tool to **automate pull request creation**, validation, and formatting.
- Reduced manual PR effort by automating branch checks, commit summaries, and metadata generation.
- **Tech Stack:** Node.js, Git, CLI tooling

Nutri Bud —Ai- powered Nutrition & Health Assistant *repo*

- Built a nutrition-focused application to help users track meals and receive personalized diet insights.
- Focused on clean UI integration and scalable backend design.
- **Tech Stack:** Next.js 15, Tailwind CSS, TypeScript, Supa base (auth & database), Groq LLaMA3 for diet, jsPDF for download

Education

Abes Institute of Technology **Sep 2023 – Aug2027**
B.Tech in Computer Science and Engineering

New Rainbow Public School **percentage% -**
Ghaziabad Senior Secondary (Class XII) *83.33%*

Technologies

Languages: JavaScript, Java, C, Node.js
Backend Development: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth
Tools & Technologies: Git, Docker, CI/CD, Postman, cURL,
Environment: Linux (wsl), vim

Achievements

- Hacknovate 7.0 - winner
- Smart India Hackathon (SIH) 2025 — Internally Shortlisted
